Lagos, Nigeria

I'm a frontend software developer, passionate about solving problems with code and transforming ideas from pixels to scalable products. I create usable applications with user experience as a top priority using various web tools, languages and technology.

CORE TECHNOLOGIES

HTML/CSS/SASS

Javascript [ES6+]

React Js

Gatsby Js

Next Js
CSS-in-JS

Typescript
GraphQL

Redux

Firebase

WORK EXPERIENCE

HeritageTelecoms — *Frontend Developer [Contract]*
DEC 2021 - PRESENT

I'm currently building and managing a fintech app for Heritage Telecoms

- Built several features primarily with React.
- Used Next Js to deliver optimised, pre-rendered pages when necessary for the web app.
- Engineered state management with Redux and Hooks.
- Maintained a well structured codebase and used Jest to perform unit tests.

DevsHelpDevs — *Frontend Developer [Volunteer]*
DECEMBER 2021 - PRESENT

I joined the devshelpdevs team to kickstart my open-source journey.

- Built the donation and the about us pages of the version one of the web app Using HTML and SASS.
- Built the pages functionalities with Javascript [ES6+].
- Integrated backend API'S with the frontend using of Ajax calls
